IA 26 – ADSORBENT

EFFLUENT ADSORPTION FOR TREATMENT OF EFFLUENTS

CHARACTERISTICS: Inorganic compound, capable of adsorbing moisture forming a solid and stable aggregate. Indicated for application on soils with excess of humidity, sludge and mud, facilitating containment, cleaning and avoiding erosion. Natural product and non-toxic to the ecosystem.

APPLICATION – PROFESSIONAL USE: Humidity adsorption.

HOW TO USE: Apply the powdered product on the area where you want to adsorb moisture. Use 10kg of the product per 1.000 L. It is not necessary to shake for the product to activate. The concentration of the product decreases proportionally to the amount of water in the applied area.

COMPOSITION: Mixture of inorganic oxides and Silanol.

PHYSICOCHEMICAL SPECIFICATIONS:

Aspect.....Powder

Color.....Gray

pH.....Not determined

Odor.....Characteristic

PACKAGING: 20kg Net Bucket.

PRECAUTIONS: Restricted to professional use. Keep the product out of reach from children and pets. Do not ingest. Avoid inhalation, aspiration and contact with eyes and skin. After using the product, wash and dry your hands. In case of contact with eyes and skin, rinse immediately with water. In case of ingestion do not induce vomiting and immediately consult the poisoning center or doctor taking the product label.

Warning: keep the product in its original packaging.

Made in Brazil.
